

# Make Reggie the Lion

Transform the sheet of paper in this pack into the King's university mascot in 10 steps.

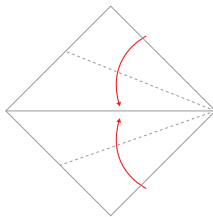

**1**

Take the square sheet and fold in half diagonally.

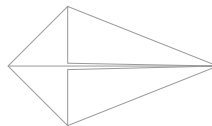

**2**

Fold the two sides into the middle.

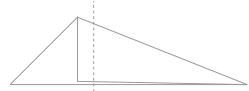

**3**

Once folded, then fold the paper with the flaps facing out.

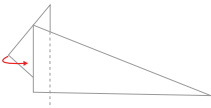

**4**

Push the smaller triangle inside, folding it upwards, so that your paper looks like the image in point 5.

**5**

Open the face of your fold to resemble the lion's mane.

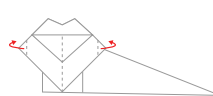

**6**

Fold down along the line to see the lion's face.

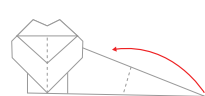

**7**

Fold the two small triangles back on the sides.

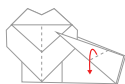

**8**

Fold the long triangle up across the lion's body.

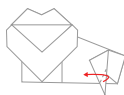

**9**

Fold down over the tail.

**10**

Last fold to make the tail straight.

**Finished**

Now you should have our Reggie the Lion origami model. Congratulations!
